Scottsboro WSG
Water Sewer Gas

**Official Notice: Upcoming Adjustment to Water Treatment Operations (Fluoride Transition)**

Dear Valued Customer,

The Scottsboro Water, Sewer, and Gas Board will be making an adjustment to its water treatment process and will no longer include the addition of fluoride to the public drinking water. To ensure complete compliance with state regulatory standards, we have filed our official intent with the Alabama Department of Public Health (ADPH). Following the 90-day mandatory state notice period, this operational change will officially take effect on **February 15th, 2027**.

## What This Means for Your Household

Your tap water remains completely safe to drink and meets or exceeds all state and federal safety requirements under the Environmental Protection Agency (EPA) and the Alabama Department of Environmental Management (ADEM). The safety, taste, and clarity of your water will not be altered by this transition.

We appreciate your partnership as we continue to invest in the long-term infrastructure and quality of life in Scottsboro. For any questions regarding this transition, please contact our customer service team at 256-574-1515.

Sincerely,

**Jim Green Jr.,**
**General Manager**
